MOSCOW – LIBRARY MANAGEMENT SYSTEM

Aim

To categorize requirements using MoSCoW method.

Procedure

1. List all requirements.

2. Analyze impact & feasibility.

3. Categorize into:

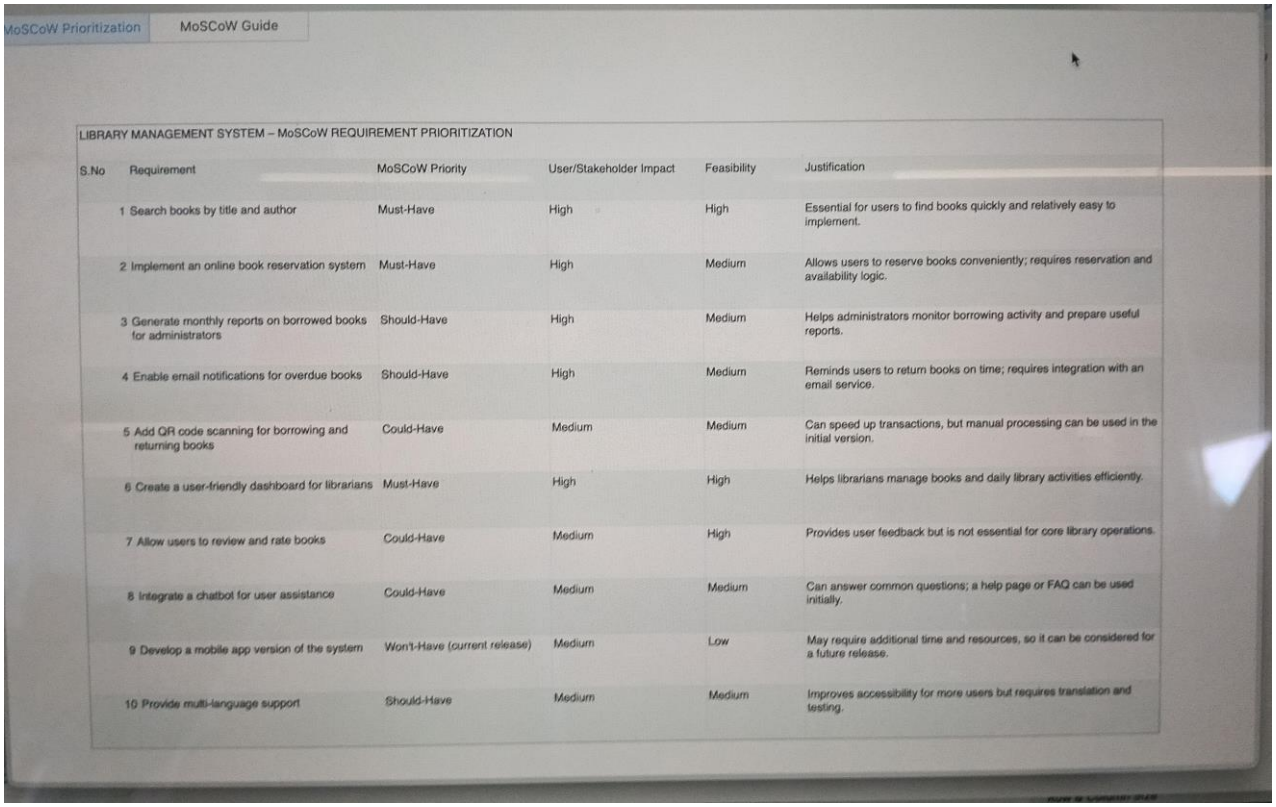

●Must Have , Should Have

●Could Have

●Won’t Have

4. Enter into Excel/Google Sheet.

5. Add justification column

MoSCoW Prioritization | MoSCoW Guide

LIBRARY MANAGEMENT SYSTEM – MoSCoW REQUIREMENT PRIORITIZATION

S.No	Requirement	MoSCoW Priority	User/Stakeholder Impact	Feasibility	Justification
1	Search books by title and author	Must-Have	High	High	Essential for users to find books quickly and relatively easy to implement.
2	Implement an online book reservation system	Must-Have	High	Medium	Allows users to reserve books conveniently; requires reservation and availability logic.
3	Generate monthly reports on borrowed books for administrators	Should-Have	High	Medium	Helps administrators monitor borrowing activity and prepare useful reports.
4	Enable email notifications for overdue books	Should-Have	High	Medium	Reminds users to return books on time; requires integration with an email service.
5	Add QR code scanning for borrowing and returning books	Could-Have	Medium	Medium	Can speed up transactions, but manual processing can be used in the initial version.
6	Create a user-friendly dashboard for librarians	Must-Have	High	High	Helps librarians manage books and daily library activities efficiently.
7	Allow users to review and rate books	Could-Have	Medium	High	Provides user feedback but is not essential for core library operations.
8	Integrate a chatbot for user assistance	Could-Have	Medium	Medium	Can answer common questions; a help page or FAQ can be used initially.
9	Develop a mobile app version of the system	Won't-Have (current release)	Medium	Low	May require additional time and resources, so it can be considered for a future release.
10	Provide multi-language support	Should-Have	Medium	Medium	Improves accessibility for more users but requires translation and testing.

Result: Thus, The Requirements categorized successfully using MoSCoW prioritization
